

I didn't want to write, but we have to accept the gravity in our relationship. Give me a schedule for the first month what you want me to do to train her, please. It's better than 34 discussing in front of her. Same thing when cock's inside u in bed if you take control of where you want it, how deep etc, by moving and subtle signals. I don't want little sis criticizing us. This way she'll respect us more. And the recruits. My reputation as a writer will help with them too.

I know you've seen the AI assistant on the blog. Fuckin' tricky to program, but better than other people's I think and v useful for our project. Test if u want; fans will be surprised at the depth.

You're not a brat. I think you are a hard-nosed bitch sometimes, but I like that. Focused, driven. If anyone's a brat, it's me. Taught at Ley Hill by D.V. McKelvie that success is everything, even successful failure (Apollo 13, 300 Spartans). You use the brat thing to cover your determination, I think. Can't stand you when you're awkward tho. I won't feel guilty about slapping your face, tits or whipping you then.

I know you think about cock 24/7. It's out now. When I feel air on my sack, it feels so much better. You never tell me when pussy's out as you're writing.

Are you watching Artemis launch Wed?

Tummy rubs this week for your period (do bfs do that?) if we don't talk again.

Ps I don't have enough experience to know if I should treat my sister as a gf sometimes. I try with the romance and treats etc., and the bdsm is a kind of treat, but I dunno about gf thing. It's bothering me.
